

## Do any of the following apply to you or your reproductive partner?

### 1. INHERITED CONDITION OR CHROMOSOMAL DISORDER?

- Genetic disorder (e.g. neurofibromatosis, cystic fibrosis)
- Muscular disorder (e.g. Duchenne or Becker muscular dystrophy)
- Bleeding disorder (e.g. hemophilia)
- Chromosome disorders such as a previous pregnancy with Down syndrome or a familial chromosomal translocation

### 2. PHYSICAL DIFFERENCE PRESENT AT BIRTH

(e.g. cleft lip, heart defect)

### 3. INTELLECTUAL DISABILITY, DEVELOPMENTAL DELAY AND/OR AUTISM

More [on the neurodevelopmental conditions here](#)

### 4. OTHER MAJOR HEALTH CONCERNS

Other major health concerns such as [cardiomyopathy](#), [neurological disease](#), [epilepsy](#), [hearing loss](#)

### 5. HISTORY OF CONSANGUINITY

Where you and your reproductive partner are related by blood

### 6. ETHNICITY

Certain populations have a higher than average chance to carry genetic variants for certain conditions.

If you answer 'yes', [see more on carrier screening here](#).

- Ashkenazi Jewish
- Mediterranean, Middle East, South East Asian, Western Pacific, Caribbean or South American
- Amish, Hutterite, or Mennonite
- Saguenay Lac-Saint-Jean and Charlevoix
- Bas-Saint-Laurent and Gaspésie (Quebec), adjoining New Brunswick
- Newfoundland

If you answer 'yes' to any of these discuss further with your healthcare practitioner (e.g. relation to yourself/partner, documentation) and a referral to your [local genetics clinic](#) maybe considered.
